Decorating help and Price Estimates...

Coming up with just the right parade float for your business or organization can be confusing and troublesome. CRS Enterprises can help with your current parade float ideas, or work with you on some new designs. We can start a new parade float from scratch, specifically designed for your business or organization, or we can re-design your pre-existing parade float.

First and foremost you need a trailer... Find a trailer platform that is sturdy, safe and legal to tow. Hay-rack trailers at least 12' - 16' long are recommended with their level trailer deck, low-boy trailers also work well... ATV or snowmobile trailers can be used but are not advised because of their limited size, stability and overall safety for the participants to ride on the parade float.

Safety First... Keep your riders and float driver safe... Build stanchions for your riders to hold onto, many parades require seatbelts for children who ride the parade units. Make sure your driver can see all the riders and have clear visibility of the parade route. If you are running a generator for lights and sound make sure it is properly ventilated and always have a fire extinguisher nearby, and make sure your decorating materials are fire retardant.

How do I decorate my parade float? Decorations for a parade float can be done in many different ways, float beds can be covered with indoor/outdoor carpet or with glitter and paint, both will take a lot of time, patience, and money. Using floral sheeting, festooning and fringe for your parade float is the most consumer friendly approach when it comes to the amount of time spent decorating and the overall professional appearance of the finished parade float. The only tools you really need are some staplers, scissors and a few decorating volunteers. *All of our parade float material is fire retardant.*

Use our drawings to help estimate the material you will need & your approximate cost.

The options listed below will help you determine what float supplies and materials you will need to decorate an existing float or trailer.

Option # 1 (8' wide x 24' long trailer bed with 2' high sidewalls). 1- 25yd. roll & 1- 10 yd. roll of vinyl sheeting. This would cover the deck & sides of float. (35 total yds.) 7- 10' rolls of **vinyl fringe**. (70 ft. total). This is enough to go around the bottom perimeter of the float. (Fringe should hang 1/2" from the ground). 2- 48' bags of **vinyl festooning**. (96' total). This is enough to go around the perimeter of the float and is used to hide the seam between the sheeting & the fringe.

Approximate price for materials on this unit: **\$ 380.08** plus shipping

NOTE: Example drawing uses festooning around the sign to hide the borders and does include floral sheeting under the sign. Price above does not reflect added sign border festooning

Option # 2 (10' wide x 24' long trailer bed with 2' high sidewalls). 2- 25 yd. rolls of floral sheeting for 50 total yards 8- 10' rolls of vinyl fringe for 80 total feet. 2- 48' bags of festooning for 96 total feet. Approximate cost: **\$ 481.00** plus shipping.

Still a little lost? We understand... Contact us with your trailer dimensions and desired color scheme and we will work out the price for you.

Decorating your parade float...

Find a trailer platform that is sturdy, safe and legal to tow, the platform should be covered with plywood for durability. Hay-rack trailers at least 12' - 16' long are recommended with their level trailer deck, low-boy trailers also work well...

Decorations for a parade float can be done in many different ways, using floral sheeting, festooning and fringe for your parade float is the most consumer friendly approach when it comes to the amount of time spent decorating and the overall professional appearance of the finished parade float. The only tools you really need are some staplers, scissors, a hammer and nails, and a few decorating volunteers.

STEP #1 The Vinyl floral sheeting is stapled to the trailer platform and the sides.

Note: You can save on sheeting materials by not covering areas that will have signs or props displayed.

STEP #2 Apply the fringe along the bottom of the float bed, allow approximately 15" from the bottom of the float bed to the ground.

Note: Fringe does not travel well at speeds over 10 mph. When traveling to parade destinations fold fringe up against float bed and hold into place with 1" x 2" x 10' strips lightly attached to sides with nails or screws and remove when you reach your destination.

STEP #3 Festooning is applied last over the top of the fringe to hide the border of the sheeting and fringe. It can also be applied around borders of signs and displays.

Keep your riders and float driver safe... Build stanchions for your riders to hold onto, many parades require seatbelts for children who ride the parade units. Make sure your driver can see all the riders and have clear visibility of the parade route. If you are running a generator for lights and sound make sure it is properly ventilated and always have a fire extinguisher nearby, and make sure your decorating materials are fire retardant.

Remember when creating a parade float is that it should be fun for all involved from your organization participants to the parade viewers on the street.

Parade Float Rentals

Charges are determined on your location, props, amount of decorating materials and labor applied. Includes rental, your companies / organizations name on the parade float, Float decoration, delivery, set-up, takedown & driver for the unit thru the parade.

Circus Train engine with animated figures including a Calliope car, bear and big cats car, giraffe & zebra car, & of course a caboose. Unit also equipped with working smoke stack, steam release, and ringing bell. Unit can be fully illuminated and can be converted to fit all Summer & Winter occasions.

Note: Scented smoke or bubbles can be released from the trains smoke stack.

This train can be decorated as the “Candy Cane Express” for a Holiday Parade or as a baby train for hospitals.

Pictured right it is decorated as a “Halloween Train”.

This train unit can be rented for your event!

ATTENTION: When purchasing any metallic materials be aware of the sun's effect on the product. Prolonged periods of exposure to direct sunlight will result in fading of the metallic materials and the loss of metallic finish. To ensure your floats original appearance, cover your parade float or store indoors when not in use. DO NOT store your parade float outside exposed to the elements.
